

# PETITION AFTER CYCLONE SIDR

Cyclone Sidr cost thousands of lives in Bangladesh. Such extreme weather events will only become more frequent and more severe as climate change accelerates. We demand that the industrialised world cut their greenhouse gas emissions by 90% by 2050 and act immediately to make changes to achieve this goal. We also demand that the industrialised nations who are mostly responsible for global warming compensate countries like Bangladesh. Its greenhouse gass emission is minimal but it will suffer the worst ravages of climate change.
